SUMMARY

I am an active, sociable person who likes to research, think and solve problems with logical thinking. Desire to find a way to combine the world of mathematical logic and the world of biology.

MY PROJECTS

● Algorithm to solve system of linear inequalities

A algorithm solves system of inequalities to find out solutions of the system of linear inequalities. It is helpful to solve graph problems, solve problems that need to find optimal conditions.

(<https://github.com/Truongphi20/inequaltion>)

● Create sum formula of polinomial functions

An algorithm helps generates the sum formula of any known polynomial function.

(<https://github.com/Truongphi20/sumfor>)

EDUCATION

● Biotechnology

Bachelors - Ho Chi Minh City University of Technology
09/2018 - 08/2022 (4 years)

Biotechnology design project:

"PROCESSING SEQUENCING AND GENERAL ANALYSIS OF GENOME OF bacteriophages for the prevention and treatment of LIGHT SHRIMP DISEASE",
by Assoc.Prof.Dr. Hoang Anh Hoang guide

University theses:

"PROCESSING PROCEDURE AND GENERAL ANALYSIS OF GENOME OF FOOD PROTECTION AND TREATMENT OF PURPOSE HEALTH DISEASES IN TRA fish",
by Assoc.Prof.Dr. Hoang Anh Hoang guide

● High school

High school - Ngo Quyen High School District 7
08/2015 - 09/2018 (3 years 2 months)

Olympic gold medal April 30 in Chemistry (2016 - 2017).
